David Sanderson

Software Engineer

Professional Summary

Albuquerque-based Fullstack Developer with a strong passion for designing, building, and deploying custom websites/software applications. Most familiar with React but also proficient with Node, Express, C#, CSS, HTML and willing to learn new technologies . Resilient and curious problem solver with 4 years of development experience, excellent interpersonal skills, and the tenacity to solve difficult problems.

Experience

Software Engineer, Product & Engineering @ Meow Wolf

April 2021 - present // Albuquerque, NM

Technologies used: **NextJS, Gatsby, Typescript, Jest, GQL, Vercel, Tailwind, Ticketure**

▷ Leverage front-end technologies to develop whimsical and imaginative web experiences.
▷ Collaborate with various stakeholders (designers, product management, qa, data engineering) to plan and create web applications that are functional, performant, and bring joy to our users.
▷ Maintain and regularly implement new features on internal and customer-facing web applications.

Jr. Software Engineer @ iTeam Consulting

February 2020 - April 2021 // Albuquerque, NM

Technologies used: **Gatsby, Git, React, C#, SharePoint, Jest, Tailwind, Bootstrap, Netlify, Active Directory, Exchange, O365, Azure, various ORMs**

▷ Migrate multiple legacy websites to the JAM stack using GatsbyJS.
▷ Maintain and regularly update legacy ASP.NET Web applications (MVC 5.0 and Razor Pages).
▷ Implement designs I create or am provided in Figma.
▷ Created a Gatsby application that sources data from Sharepoint Lists to programmatically create web pages.

Resident Web Developer @ Activate New Mexico

October 2019 - February 2020 // Albuquerque, NM

Technologies used: **React, Gatsby, GQL, WordPress, MySQL, MySQL Workbench**

▷ Provided technical support and consultation to early-stage startups.
▷ Draft and execute project charters.
▷ Created 3 websites for participating startups.
▷ Conducted database design for a health-care startup.
